### About This Game

**Dream Car Builder** is a game where you can design your own car and race it. Designing the perfect frame and steering system is no simple matter. If you are interested, and are up for the challenge, this game is for you!

### Key Features

- Car editor: Build your own cars.
- Single player: Race on procedurally generated tracks.
- Sandbox: Build cars without limitations.
- 100% realistic soft body physics:  
Slow down the time. Build deformable cars.
- User-generated content:  
Create and share your vehicles, tracks and maps.

**Attention:** You can compete with your friends, see their cars, create tracks and setup conditions for each race. But you cannot collide with the other players' cars. This is not a realtime multi-player game!

### **How to set up a Dream Car Builder Dedicated Server:**

You can download the "DCB Server" tool either through the Steam tool section, or SteamCMD if you would like to avoid signing into steam entirely!

#### **Option 1.**

1. In the Library tab select Tools. Locate "DCB Server" and install it.

The installation folder: Library -> Tools -> Locate "DCB Server" and right click on it -> Properties -> Local files -> Browse local files...

#### **Option 2.**

1. Make a folder somewhere you will remember, and call it SteamCMD

2. Download the zip from here: <https://steamcdn-a.akamaihd.net/client/installer/steamcmd.zip>

3. Extract steamcmd.zip into the SteamCMD folder

4. Start "steamcmd.exe" then type this after:

+login anonymous +force\_install\_dir c:\DCBServer +app\_update 1010510 validate +quit. **Update 25.2017.11.17.0 ea:**

- Use G to show/hide the groups window
- Hold Space to make the segments unselectable to make it easier to select panels.
